General framework – objectives

Pollution and ecosystem degradation are the main causes of pathology and the erosion of biodiversity in the world.

According to the WHO, the pollution is considered a major contributor to non-communicable diseases such as heart attacks, strokes and lung cancer, and accelerates climate change. Treating them can help reduce health risks from extreme weather events, sea level rise, drought and food production.

The 2nd National Health and Environment Seminar (SENASE 2024) aims to debate the themes that are currently in the news among citizens, namely:

Themes

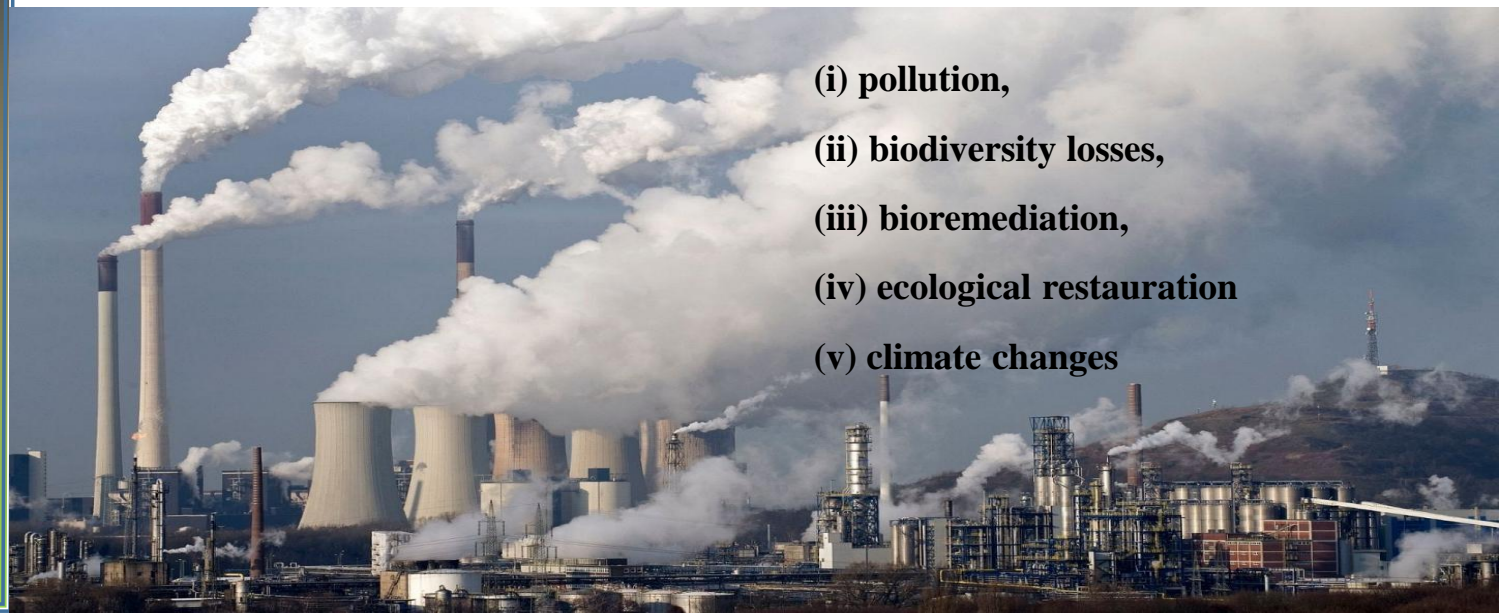

- Theme 1: Pollution and human health
- Theme 2: Pollution and environmental health
- Theme 3: Bioremediation and Rehabilitation polluted sites
- Theme 4: Restoration of ecosystems
- Theme 5: Climate changes

Registration fees

- Teachers / Researchers: 5000 DA
- Doctoral students: 3000 DA
- Exhibitors 20000 DA
- NB: accommodation is not included.
